

# IMPLEMENTATION OF DWBI

## Airlines

### Project

**BIDW Implementation for airlines**

### Client

**Leading Airlines Company**

### Summary

A leading airline organization which operates scheduled domestic and international passenger services, as well as regional air taxi and charter flights approached us to design and develop a centralized data warehouse solution with BI reports at enterprise level.

### Challenge

To implement a centralized data model and reporting for giving clarity on flight operations, Ground Handling & Revenue brought by them by Region and POS to increase their air traffic across globe and ground support for other Airlines. Currently each department is having their own reporting - matching and integrating them for decision support is difficult as data parsing used to be done once in a month/Week with proration calculations to get the exact number.

**Solution**

Implemented a centralized Data Mart to integrate the data from IATA,SITA, internal Air Messages, Ground Handling data & MSSQL database's to support a common reporting across the departments by Regions is implemented with the help of ODI & OBIEE along with proper security restrictions.

**Result**

- Single click reporting across different community.
- Timely service support for the tenants & | members of the community.
- Identifying the best employees & proper appreciation in time.
