

# Biometric Finger Print

Manufacturing

## Project

Biometric Finger Print

## Client

Leading Retail Manufacturer

## Summary

- IMP Provides training & counselling to understand and utilize the unlimited power of mind and develop Mid Brain Activation and they help kids to develop their DMIA, memory power through various program.

## Challenges

- They need an application which can read the Finger prints of a hand and store them in a database and read the finger prints which helps to calculate the individual's performance of their brain.

## Solution

- Created a transactional system which helps to track the finger prints in online mode and offline mode and save the data in the local and server.
- Whenever the analyst needs to access the data he can access them through portal and update the brain calibration across different activities.

## Results

- An efficient way to store the data and access them where ever they need it
