IMPLEMENTATION

Project

Implementation of SCM BI Apps

Client

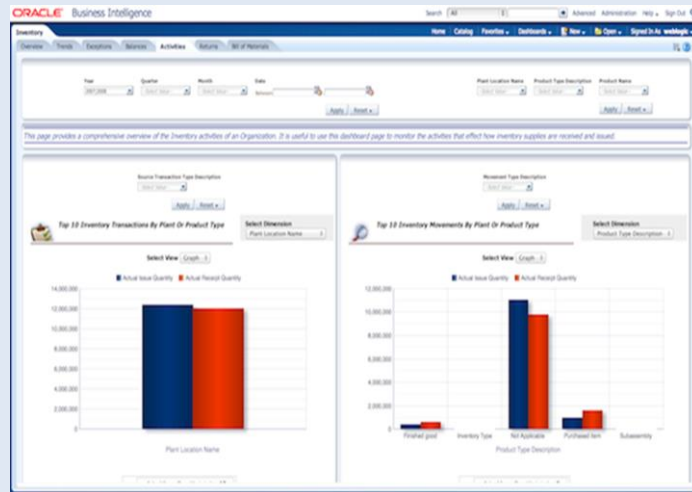

Leading Software Development Organization

Summary

The SCM BI Apps was implemented for a leading software development organization. SCM BI provides an undivided platform to plan and manage team in quest of answers that give their operational and business decisions.

Challenges

- The organization needs more insight of their Supplies and Inventory details to make their capacity requirement and their Inventory projection of actual sales to their projected inventory.

Solution

- Implemented Oracle BIAPPS for SCM and Customized the SCM Tables as per the ERP customization.
- Created reports for projected inventory to their actual sales and calculate the capacity requirement for coming quarters /Months to make capacity available.

Results

Data validation and analysis of existing data model. Intelligent fraud detection and improved customer experience. ETL mapping and workflow to load dimension tables. Based on the new model RPD is recreated to suit the reporting requirements. New data model and ETL process will ensure better performance of ETL and reports.
